

Thought for a couple of seconds

Here is the product summary I have so far:

- **Product:** ParaPharm / paracetamol plus caffeine
- **NDHPA number:** UG1234
- **Affected batches:** 1024, 1025, 1026
- **Manufacturing date:** January 2026
- **Description:** 500 milligram film-coated tablets, blister pack of 28
- **Reason for recall:** An ingredient received from your supplier failed testing on the supplier's side. The affected ingredient has been associated with nausea and vomiting, with no more serious adverse effects identified to date.

Two points need tightening before we generate official documents:

1. You gave the **manufacturing date**, but I still need the **expiry date(s)** for batches 1024 to 1026.
2. You gave the form and strength, but I still need the **intended use** wording, for example: "for the management of mild to moderate pain and fever."

Please confirm the summary is correct, then answer these two missing points and we will move straight to Phase 3:

1. What are the **expiry date(s)** for batches 1024, 1025, and 1026?
2. What is the **intended use** of ParaPharm?

1. March 2028
2. Intended uses for headaches and other pains.

- **Description:** 500 milligram film-coated tablets, blister pack of 28
- **Intended use:** headaches and other pains
- **Reason for recall:** An ingredient received from your supplier failed testing on the supplier's side and has been associated with nausea and vomiting, with no more serious adverse effects identified to date

Almost there. This phase is the most important for the recall to actually work, we need to know exactly where the product has gone. Pull up your distribution records.

Please answer these four questions:

1. What is the **total quantity** of the affected batch(es) that entered your possession, that is, what did you receive from the manufacturer or supplier?
2. How much of the affected batch(es) **remains in your own warehouse** right now, stock that has not yet been distributed?
3. Please list every **customer or outlet** that received the affected batch(es). For each, give:
 - Customer name
 - Type (hospital / pharmacy / health centre / drug shop / wholesaler / NGO / government facility / other)
 - Town or district
 - Contact person's name, phone number, and email address
 - Quantity supplied to them
 - Date(s) supplied

If the list is long, start with the ten most important, especially hospitals, highest quantities, and any customer that dispenses directly to patients.

4. Your company details for the official documents:
 - Company full legal name
 - Physical address and district
 - NDHPA Distribution Licence number
 - Name, phone number, and NDHPA registration number of your **responsible pharmacist**
 - Your own name, role, phone number, and email as the primary contact for NDHPA

1. 1000 packs
2. 0
3. tygerberg hospital, cape town, chris barker, 0831231234, 1000, january 2026
4. Abacus Pharma, Kampala uganda, ND12234, coreen barker, Ph12345, 0831231122

Pasted text

- Affix quarantine labels to any product recovered going forward
- Under no circumstances allow any further distribution, dispensing, or sale of this product from the affected batches.  This is now a legal requirement under Section 43(2) of the NDHPA Act 2025
- Locate complete distribution records for batches **1024 to 1026**
- Alert Responsible Pharmacist **Coreen Barker** immediately if not already leading the process
- Extract pharmacovigilance records relating to the nausea and vomiting cases already identified

T+60 MINUTES

- Send NDHPA Notification Letter to the Executive Director by the fastest available means
- Follow up with a call to confirm receipt
- Notify supplier or manufacturer using the manufacturer notification
- Begin sending Customer Recall Notices, starting with **Tygerberg Hospital**
- Brief all customer-facing staff: no one is to take orders for or confirm availability of ParaPharm batches 1024, 1025, 1026

T+2-4 HOURS

- Customer Recall Notice dispatched by email, WhatsApp, and phone call
- Arrange product return logistics from **Tygerberg Hospital, Cape Town**
- Open Recall Tracking Log and enter customer dispatch details
- Ensure all adverse events are routed through the approved pharmacovigilance system

T+24 HOURS

- Follow up with Tygerberg Hospital if acknowledgment has not been received
- Log any returned stock immediately
- Send brief status update to NDHPA confirming:
 - notices dispatched
 - customers contacted
 - quantities outstanding
 - adverse events identified to date
- Confirm no additional stock exists anywhere in the distribution chain under company control

T+72 HOURS

- Send written status report to NDHPA based on the tracking log
- Continue recovery follow-up until all 1,000 packs are accounted for
- Do not destroy any returned stock: maintain secure quarantine and await NDHPA instruction on court-ordered destruction under Section 103

ONGOING

- Update tracking log daily
- Cooperate fully with NDHPA inspectors
- Pursue root cause details from supplier
- Prepare final effectiveness report when recall is complete

Dispatch instruction: Print this checklist now, assign an owner to each action, and use it as your live internal control sheet for the next 72 hours.

Document 2: NDHPA Notification Letter

[ABACUS PHARMA LETTERHEAD]

23 April 2026, [insert current time]

BY HAND / EMAIL - URGENT

The Executive Director
National Drug and Health Products Authority
Plot 46-48 Lumumba Avenue
P.O. Box 23096
Kampala, Uganda

Dear Executive Director,

1. Company and Licence Details

Abacus Pharma is a licensed pharmaceutical distributor operating in Uganda under NDHPA Distribution Licence Number **ND12234**. The pharmacist responsible for our distribution operations is **Coreen Barker**, registered under NDHPA registration number **Ph12345**, contactable on **0831231122**. Email: **[insert pharmacist email]**.

2. Product Subject to Recall

We hereby notify the Authority of a voluntary product recall of the following:

FIELD	DETAIL
Product (Brand Name)	ParaPharm
Generic / INN Name	paracetamol plus caffeine
NDHPA Registration / Notification Number	UG1234
Dosage Form and Strength	500 milligram film-coated tablets
Pack Size	Blister pack of 28
Affected Batch Number(s)	1024, 1025, 1026
Manufacturing Date	January 2026
Expiry Date	March 2028

3. Nature and Description of the Defect

We have identified a quality defect affecting the above batch(es). An ingredient received from our supplier has failed testing on the supplier's side. The ingredient has been associated with nausea and vomiting. Based on information presently available to us, the adverse effects linked to this issue are limited to nausea and violent vomiting, with no more serious adverse outcomes identified to date.

4. Risk Assessment

We have assessed this recall as **Class II**. We have classified this as Class II because the affected product may cause temporary adverse health consequences, specifically nausea and vomiting, but the risk of serious or permanent harm appears low based on current information.

We wish to advise the Authority that several adverse event reports have been brought to our attention through our pharmacovigilance system. Details are being compiled and will be submitted through the pharmacovigilance system as required.

5. Distribution Details

Total quantity of affected batch(es) received: **1,000 packs**
Quantity remaining in our own stock (now quarantined): **0 packs**
Quantity distributed to customers: **1,000 packs**

Distribution was made to the following outlet(s):

CUSTOMER NAME	TYPE	LOCATION	QUANTITY	DATE SUPPLIED
Tygerberg Hospital	[insert type]	Cape Town	1,000 packs	January 2026

6. Actions Taken and Planned

- We have taken the following immediate actions:
- All further distribution of the affected batch(es) has been halted
 - We have initiated customer recall communication to the consignee identified above

- We are arranging the return and secure quarantine of all distributed stock pending the Authority's instructions regarding court-ordered destruction under Section 103 of the Act
- We are reviewing pharmacovigilance reports linked to the affected product and will submit the required reports to the Authority

7. Undertaking

Abacus Pharma undertakes to cooperate fully with the Authority in the management of this recall. We will provide status updates at 24 and 72 hours and upon request. We understand that all recalled stock must be held in secure quarantine and that destruction may only proceed following a court order obtained by the Authority under Section 103 of the NDHPA Act, 2025. We confirm that all costs associated with this recall and any subsequent destruction will be borne by this company.

We are available at any time to discuss this matter further.

Yours faithfully,

[Insert signatory name]

[Insert title]

Abacus Pharma

Phone: [insert primary contact phone if different]

Email: [insert primary contact email]

Copied to: **Coreen Barker, Responsible Pharmacist**

Attachment: Distribution records for affected batch(es)

Dispatch instruction: Send this to NDHPA today by email and hand delivery if possible. Then call to confirm receipt within the hour.

Document 3: Internal Halt-Supply Alert

URGENT - PRODUCT RECALL NOTICE - ALL STAFF

Date: 23 April 2026

Time: [insert current time]

From: Coreen Barker, Responsible Pharmacist

To: All Warehouse, Sales, Logistics, and Customer Service Staff

IMMEDIATE ACTION REQUIRED - READ THIS NOW

Effective immediately, the following product is subject to a product recall:

Product: ParaPharm / paracetamol plus caffeine

Affected Batch(es): 1024, 1025, 1026

Expiry Date(s): March 2028

YOU MUST DO THE FOLLOWING RIGHT NOW:

1. **STOP.** Do not pick, pack, dispatch, or hand over any stock from the above batch(es) under any circumstances, effective immediately.
2. If you have any of the above stock in your vehicle, at a customer site, or in transit, do not deliver it. Return it to controlled custody immediately.
3. If a customer calls asking about this product or these batch numbers, tell them a notice is being sent to them today and transfer the call to **Coreen Barker on 0831231122**.
4. Do not discuss the details of this recall with customers beyond what is in the official notice being sent to them.

WHY THIS MATTERS: Under Section 43(2) of the National Drug and Health Products Authority Act, 2025, continued supply of a product subject to a recall is a **criminal offence**. This applies to every individual involved in the supply chain.

If you are unsure whether a specific item falls within these batches, stop the transaction and call **Coreen Barker on 0831231122** immediately.

No exceptions. No workarounds.

Dispatch instruction: Send this by staff WhatsApp, email, and verbal briefing immediately, before any external communication.

Document 4: Customer Recall Notice

⚠️ URGENT: PRODUCT RECALL NOTICE ⚠️

Date: 23 April 2026

Reference: Abacus Pharma / RECALL / ParaPharm / 1024-1026 / 2026

To: Tygerberg Hospital

Attention: Chris Barker / Pharmacy Manager

RE: MANDATORY RECALL - PARAPHARM, BATCHES 1024, 1025, 1026

Dear Chris Barker,

Abacus Pharma, as the licensed distributor of ParaPharm in Uganda, is issuing this **mandatory product recall notice** for the following product supplied to your facility:

PRODUCT NAME	BATCH NUMBER(S)	EXPIRY DATE	QUANTITY SUPPLIED TO YOU	DATE SUPPLIED
ParaPharm, 500 milligram film-coated tablets, blister pack of 28	1024, 1025, 1026	March 2028	1,000 packs	January 2026

Reason for Recall:

An ingredient used in this product has failed testing on the supplier's side and has been associated with nausea and violent vomiting. Based on current information, no more serious adverse effects have been identified to date. This product should not be used.

ACTIONS REQUIRED FROM YOU - PLEASE ACT TODAY:

Step 1 - QUARANTINE IMMEDIATELY

Remove all stock of ParaPharm from batches 1024, 1025, and 1026 from your dispensary shelves, storage, and anywhere else it may be held. Place it in a separate, clearly labelled area. Mark it: **"RECALLED - DO NOT DISPENSE."**

Step 2 - STOP DISPENSING

Do not dispense, sell, or supply any further product from these batch numbers to any patient or customer, effective immediately.

Step 3 - CONTACT US WITHIN 24 HOURS

Call or WhatsApp **Coreen Barker on 0831231122** or email **[insert recall email]** to confirm you have received this notice and to arrange the return of the quarantined stock.

Step 4 - COMPLETE AND RETURN THE ACKNOWLEDGMENT FORM

The Return Acknowledgment Form is attached to this notice. Please complete it and return it with the product when our representative collects it, or photograph it and send it by WhatsApp before collection.

Collection: Our representative will contact you within **24 hours** to arrange collection at no cost to you. Alternatively, if you prefer to return the stock directly, please bring it to **Abacus Pharma, Kampala, Uganda**.

If you have already dispensed any product from these batch numbers to patients or customers: Please record those patients' details where possible and contact us immediately. Patient safety is our priority and we will advise you on any follow-up steps.

We apologise for the inconvenience this recall causes and thank you for your immediate cooperation. This action is being taken in compliance with the National Drug and Health Products Authority Act, 2025.

Yours faithfully,

**Coreen Barker**

Document 6: Manufacturer / Licence Holder Notification

Subject: URGENT - Product Recall Initiated in Uganda - ParaPharm, Batches 1024, 1025, 1026

Dear [Supplier / Manufacturer Contact Name / Regulatory Affairs Team],

We write to formally notify you that **Abacus Pharma**, as the licensed distributor and/or authorised representative in Uganda, has initiated a product recall of **ParaPharm / paracetamol plus caffeine**, batches **1024, 1025, and 1026**, with immediate effect.

Reason: An ingredient received from your side has failed testing and has been associated with nausea and violent vomiting. Based on current information, no more serious adverse effects have been identified to date.

Regulatory action: We are notifying the National Drug and Health Products Authority of Uganda today under Section 43(4) of the National Drug and Health Products Authority Act, 2025. Customer recall notices are being dispatched simultaneously.

Quantities affected:

- Total received by us: **1,000 packs**
- Remaining in our stock: **0 packs**
- Distributed to customers: **1,000 packs**
- Customers supplied: **1 known consignee currently identified in this record, Tygerberg Hospital**

What we need from you:

1. **Written acknowledgment** of this notification within 24 hours
2. **Full technical details** of the root cause of the defect
3. **Confirmation of your position on cost recovery** for this recall. Under the NDHPA Act, recall costs fall on the in-country licence holder. We reserve our rights to recover those costs under our supply agreement
4. **Any customer or patient safety guidance** that should be communicated to healthcare professionals regarding product already dispensed
5. **Confirmation of all affected lots and markets**, in case the issue extends beyond batches 1024 to 1026

Please note that under Section 103 of the NDHPA Act, 2025, destruction of recalled product in Uganda requires a court order obtained by the NDHPA. We will hold all recalled stock in secure quarantine and will not destroy it without that court order and NDHPA instruction.

We will keep you updated on the progress of the recall.

Yours sincerely,

[Insert name]

[Insert title]

Abacus Pharma

Kampala, Uganda

Phone: [insert primary contact phone]

Email: [insert primary contact email]

Dispatch instruction: Send this by email today and call for written acknowledgment within 24 hours.

Document 7: Quarantine Label

Print one for each returned carton, pallet, shelf, or tote:

⚠️ QUARANTINED – DO NOT DISTRIBUTE ⚠️	
Product:	ParaPharm, 500 mg film-coated tablets
Batch Number:	1024 / 1025 / 1026
Expiry Date:	March 2028

Recall Reference: Abacus/RECALL/ParaPharm/1024-1026/2026

Date Quarantined: 23 April 2026 at [insert time]

Quarantined by: _____

This product is subject to a mandatory recall under Section 43 of the National Drug and Health Products Authority Act, 2025.

DESTRUCTION OF THIS PRODUCT MAY ONLY TAKE PLACE FOLLOWING A COURT ORDER UNDER SECTION 103 OF THE NDHPA ACT, 2025. DO NOT DESTROY WITHOUT NDHPA WRITTEN INSTRUCTION AND COURT AUTHORISATION.

Dispatch instruction: Print at A5 or larger and attach immediately to every recovered unit or holding area.

Document 8: Recall Tracking Log

ABACUS PHARMA - PRODUCT RECALL TRACKING LOG

Product: ParaPharm / paracetamol plus caffeine

Batch(es): 1024, 1025, 1026

Recall Reference: Abacus Pharma / RECALL / ParaPharm / 1024-1026 / 2026

Recall initiated: 23 April 2026

#	CUSTOMER NAME	TYPE	DISTRICT	CONTACT	QTY SUPPLIED	RECALL NOTICE SENT (DATE / TIME / METHO
1	Tygerberg Hospital	[insert type]	Cape Town	Chris Barker, 0831231234, [insert email]	1000	

Summary (update daily)

METRIC	FIGURE
Total quantity distributed to customers	1,000 packs
Total quantity in own stock (quarantined)	0 packs
Total quantity recovered from customers	0 packs
Total quantity outstanding (unrecovered)	1,000 packs
Recovery rate	0%
Customers notified	0 of 1
Acknowledgments received	0 of 1
Adverse events reported	Several, exact number to be confirmed through pharmacovigilance records

Target recovery rate: 100%

A recall is not considered effective until all distributed product has been accounted for, either returned or confirmed as dispensed to end patients.

Dispatch instruction: Open this as a spreadsheet now and update it with every call, message, acknowledgment, and return.

Those are all eight documents. Here is your dispatch order of priority:

- Document 3 (Internal Alert):** send to all staff right now, before anything else leaves the building
- Document 7 (Quarantine Labels):** print and prepare for all returned stock immediately

3. **Document 2 (NDHPA Notification):** deliver or email to NDHPA today, then call to confirm receipt
4. **Document 4 (Customer Notices):** begin dispatching immediately, starting with Tygerberg Hospital
5. **Document 6 (Manufacturer Notification):** send today
6. **Document 8 (Tracking Log):** open in a spreadsheet now and start filling it in as acknowledgments come in

Documents 1 and 5 are operational tools to use as the recall progresses.

There are a few data issues you should correct before sending:

- Tygerberg Hospital is in South Africa, while this pack is framed as an NDHPA Uganda recall
- the customer record is missing an email address and customer type
- your company contact block is missing your own role and email
- the pharmacist email is still missing

Send me those missing details and I will clean the pack into send-ready final versions.
